

Option 1:
 Provide 12 VDC to pin 6 of the connector either from a switch connected to a fused (100mA) 12V source, or a suitable 12V signal indicating 4WD mode capable of providing 20mA (dash light)

Option 2:
 Provide Ground to pin 3 of the connector either from a switch connected to ground, or a suitable ground signal indicating 4WD mode capable of sinking 20ma (dash light)

Back of cable connector

NOTE
 Implement only option 1 OR option 2, do not implement both options
